## NEWS FROM NEVADA

**Brief Interview With Peter Grant on That Section.**

**GOLDFIELDS A BUSY CENTER**

**Some Great Properties Being Exploited There—Millions in Precious Metals Everywhere in the District—Several Astorians There.**

Peter Grant, formerly of this city, but now of Goldfields, Nevada, is in the city, on a brief visit with the home folks, and enjoying himself thoroughly with old friends.

In response to a reportorial inquiry yesterday, made in behalf of the Astorian, Mr. Grant said, in part:

"I am not the only Astorian down in that part of the world. Jim Taylor is there, superintending the installation of a big water system and doing finely. Tom Rawlins is an engineer in one of the largest of the mines, Larry Sullivan is my partner in business there, as is Naer, my brother, and we are doing splendidly, with prospects brightening all the time. Larry is casting a wary and wise eye about the mining investments there and is likely to make a winning at any time.

"The district is inordinately rich in metals and some very heavy mining ventures are afoot there now. Notable among these is the 'Mizpah' mine, the value of which is quoted at \$40,000,000, this being based, of course, upon the value of its stock, which now ranges at \$30 per share, and the property is said to pay 25 per cent per quarter on an investment of \$400,000. This mine is in the famous Tonopah district.

"In the Goldfields district there are a number of fancy properties, all big dividend payers, among them being the 'Combination' mine which pays 10 per cent per month on an investment of half a million; the Jumbo, Sandstorm, Red Top, Florence, January, and Kendall mines, all of which are paying handsomely, with certain and abundant prospects.

Mr. Grant was recently in the 'Ely' district, which is 250 miles distant from Goldfields, as the crow flies, and about 800 miles, by transportation routes. This, he claims, is a new and prosperous section, and a great copper district. It is in White Pine county and has lain dormant for years; it is reached by rail from Tomanah, on the Central Pacific, and is filling up rapidly. The copper belt underlying the Ely district is said to be eleven miles in length and from one quarter to one-half mile wide.

He reports one property that was marketed there recently at \$1 per share, and before the stock could be uttered and delivered, it had gone to \$3 per share and before it was well under mechanical working, had reached \$10. Now, there is no further output of the stock, the owners husbanding the splendid wealth they have under control.

Big concentrators, and matte smelters abound everywhere in the Ely section and business in growing in all lines and on all sides.

The old lead mines of the district are being opened up steadily, as lead is needed for the fluxing of the output at the gold mines, and, taking all things into consideration, Mr. Grant is of the opinion Nevada is going to figure, again, as one of the most important and among the richest, of the world's mining centers.

The one drawback is the scarcity of water in what is practically a desert country, but government aid in this vital particular is being invoked, and the sinking of wells is all there is to it, for there is an abundance of water at reasonable depth, and this question is easily soluble.

Mr. Grant says his trip home is very refreshing and pleasant in many ways and he is enjoying it heartily, but will return to Nevada soon, to resume active interest in his own affairs, which are prospering nicely.

**LEST YOU FORGET.**

Is it not about time you were getting that buggy fixed up? It may need new rubber tires or perhaps some other repairs. If so, take it to Andrew Asp & Company. They also do all kinds of blacksmithing and repair work.
